PROFESSIONAL SUMMARY

Power Platform and Dynamics 365 Developer with 2.5+ years building enterprise business applications and workflow automations on Microsoft Dataverse, Model-Driven Apps, Power Automate, Power Pages, and SharePoint Online. Strong in C# plugin development, JavaScript web resources, and Azure Functions integrations. Experienced in solution-based development and Application Lifecycle Management (ALM) across development, test, and production environments, with Microsoft Entra ID (Azure AD) authentication and role-based access control. Owns end-to-end delivery from requirement gathering through deployment and post-production support, while mentoring a small development team. Microsoft PL-400 certification in progress.

CORE COMPETENCIES

Microsoft Power Platform • Power Apps (Model-Driven) • Power Automate (Cloud Flows) • Microsoft Dataverse • Power Pages • SharePoint Online • Application Lifecycle Management (ALM) • Solution-Based Development • Microsoft Entra ID (Azure AD) • Role-Based Access Control • Azure Functions • Microsoft Dynamics 365 CE • C# • JavaScript • HTML • CSS • SQL • FetchXML • Data Modeling • REST / SOAP APIs • Requirement Gathering • Application Support & User Training

TECHNICAL SKILLS

Power Platform: Power Apps (Model-Driven Apps), Power Automate Cloud Flows, Business Process Flows, Microsoft Dataverse, Power Pages

Microsoft 365 & Cloud: SharePoint Online (Lists, Libraries, Permissions), Azure Functions, Microsoft Entra ID (Azure AD) Authentication & Role-Based Access Control

Development: C# Plugin Development (Pre/Post Images, Sync/Async, Depth Guards, Recursion Handling), JavaScript Web Resources (Form Scripting, Validations, Ribbon Commands), HTML, CSS

Data & Integration: Data Modeling, FetchXML, QueryExpression, SQL, REST / SOAP APIs, Azure-based Integrations (Workday, Stripe, DocuSign, QuickBooks)

ALM & DevOps: Solution-Based Development, Managed / Unmanaged Solutions, Environment Deployments (Dev / Test / Production), Git

Languages: C#, JavaScript, Java, HTML, CSS, SQL

PROFESSIONAL EXPERIENCE

Software Engineer – Power Platform & Dynamics 365

Alphavima Technologies | Ahmedabad, India | March 2025 – Present

- Lead client discovery and requirement-gathering sessions independently; translate business needs into Power Platform solutions with feasibility and timeline assessments.
- Design, develop, and maintain business applications using Power Apps (Model-Driven), Microsoft Dataverse data models, and Power Automate cloud flows; build C# plugins and JavaScript web resources for complex business logic.
- Build and manage SharePoint Online lists and libraries with permissions management, integrated with Power Platform solutions.
- Own solution-based development and Application Lifecycle Management (ALM): package managed/unmanaged solutions and control deployments across development, test, and production environments.
- Configure Microsoft Entra ID (Azure AD) authentication and role-based access control for secure application access.
- Guide and mentor a small development team, conduct code reviews, and lead hypercare and post-production support for stable go-lives.
- Drive root-cause analysis on production incidents, resolving plugin failures, pipeline conflicts, and data inconsistencies, improving reliability by approximately 30%.

Associate Engineer – Dynamics 365 & Power Platform

Alphavima Technologies | Ahmedabad, India | August 2024 – March 2025

- Designed and delivered end-to-end Dynamics 365 CE customizations: C# plugins (pre/post-stage, sync/async, depth guards), Dataverse data modeling, and Power Automate workflow automation.
- Integrated Workday, Stripe, DocuSign, and QuickBooks via Azure Functions and REST/SOAP APIs, reducing manual steps by approximately 35%.
- Built reusable Clone functionality and PDF invoice export automation; developed Power Pages self-service portals for operations.
- Delivered three full projects including hypercare and post-production support, ahead of estimated timelines.

Trainee Engineer – Dynamics 365 Developer

Alphavima Technologies | Ahmedabad, India | March 2024 – August 2024

- Developed application customizations (plugins, workflows, JavaScript web resources), reducing bug-related delays by approximately 20%.
- Contributed to technical documentation and solution handoffs, improving team delivery speed by approximately 15%.

KEY PROJECTS

Inventory Management & ERP Integration

Dynamics 365, Power Pages, Azure Functions, Workday SOAP

Delivered custom asset tracking with real-time Workday ERP synchronization and a Power Pages self-service portal.

Enterprise CRM & Multi-System Integration

Dynamics 365 CE, C#, JavaScript, Power Automate, Azure

Built sales/service business applications with Azure-based integrations, improving client satisfaction.

Secure Payment Integration

Dynamics 365, Stripe APIs, Azure Functions, C#

Implemented a Stripe PaymentIntent flow with webhook handling and order/invoice lifecycle synchronization.

Rental Operations Automation

Dynamics 365, Power Automate, C#

Automated rental operations workflows, reducing manual effort by approximately 50%, with dashboards to improve decision speed.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science – SRM University, Chennai | 2015 – 2019

Full Stack Web Development – Masai School, Bengaluru | 2022 – 2023

CERTIFICATIONS

Microsoft PL-400: Power Platform Developer Associate – In Progress

Prompt Engineering – Masai | 2023

Career Edge – TCS iON | 2019
